

Announcement about applications to the Emergency Student Fund for Undergraduates and Postgraduates over the Summer 2020 period

Dear students and parents,

As we announced previously, we have created the **Emergency Student Fund** in order to support those families whose income has been severely affected by the COVID-19 emergency.

We inform you that applications for the Fund by undergraduate and postgraduate students who had planned to study over the **Summer 2020 period** will once again be enabled via **MiTec student** website from today until **June 9**, under the heading: **COVID-19 EMERGENCY SUPPORT FOR ACTIVE UNDERGRADUATE AND POSTGRADUATE STUDENTS OVER THE SUMMER 2020 PERIOD.**

Those students who have received support during the months of April, May, and June and require it again for the summer period need only access the website to request its reactivation.

If support has not been granted previously, the following information will be required:

1. An explanation of your reasons for requesting support (half a page at most)
2. Completion of the questionnaire related to your request for support
3. Documentation substantiating your request

Once we have received this request, the committee operating the Fund will process it and the response will be published on the system.

Similarly, we inform you that a special support fund has been set up, consisting of funds obtained from donations and reductions in administrative expenses, which will be used next semester for those who may be facing financial hardship as a result of the COVID-19 crisis. If you are experiencing these circumstances, we ask that you get in touch with the Scholarships area for your campus.

We thank you for your trust and reiterate our commitment to and solidarity with you during this emergency.
